

IN THE SPECIFICATION:

Please amend the paragraph on page 1, lines 4-10, to read as follows:

Field of the Invention

The present invention relates generally to a liquid crystal display device, and more particularly to a liquid crystal display device which has uniform feedthrough voltage components, a high image luminance, and high image display quality.

IN THE CLAIMS:

Please cancel claims 8 and 14.

REMARKS

Reconsideration of this application based on the foregoing Amendment and the following Remarks is respectfully requested.

Specification: Page 1, line 8

The Examiner has objected to the disclosure in the specification because of an informality in that on page 1, line 8, the word “feedthorugh” should be “feedthrough”.

In response, the applicant has amended the specification to make the appropriate correction requested by the Examiner.

Drawings: FIG. 1A

The Examiner has objected to the drawings because the specification on page 16, line 6, discloses “as can be seen from an arrow A in FIG. 1A;” but the arrow in FIG. 1A is not identified as “A”.
